## Choosing Leather

It is important to understand the characteristics of leather when choosing to purchase this type of sofa. Leather suites are classic and timeless; the high quality, natural and hard wearing leathers we offer look great and are really easy to care for. It is key to note that leather will move over time and may display traces of the past such as healed scars, insect bites, growth marks and veins. These are all hallmarks of hide and in no way detract from the wearing qualities of leather.

## Fabrics

All Parker Knoll fabrics are available as cut lengths and can be supplied (to the nearest half metre). When ordering, please state the fabric and colour reference clearly. Leather is not available as a cut length.

Some fabrics in the collection may only be available to order on scatter cushions, chairs and other accent pieces. Please refer to the swatch books in store for further information.

## Fabric Samples

Fabric samples are available on request from our website; we endeavour to deliver within 2-3 working days.

Please refer to our website for up to date lead times.

## Railroaded Fabrics

**SELECTING A NON-RAILROADED FABRIC**  
The design of a non-railroaded fabric will require a different manufacturing method which will slightly alter the appearance of the Isabelle sofas as follows:

The Isabelle Large Two Seater Sofa and Two Seater Sofa will have a centre seam running through the back, seat and front border.

If a fabric is railroaded, it will state clearly on the back of each fabric in the swatch. A railroaded fabric will have no joins on the back seats.

Please note that railroaded fabrics are not suitable for curtains; please refer to the swatch books in store for further information.

## Sofa Buying Guide

# Choosing Fabrics

When choosing a Parker Knoll fabric, it is advisable to think about the environmental and lifestyle factors that may impact upon fabric behaviour.

We recommend that you do not expose your upholstery to long periods of direct sunlight, as this may result in fading. Close and constant exposure to heat can also influence colouration so it is important to consider where in the room your sofa will be placed when choosing fabric.

It is also key to consider the fabric type and its associate behaviours and characteristics. A fabric with a pile direction such as chenilles or velvets may naturally flatten and be influenced by pressure or shade as the fibres change.

Appropriate care of your upholstery will ensure your velvet or chenille furniture looks fabulous and stands the test of time.

All of the fabrics within the Parker Knoll fabric collection are tested for use in a domestic environment.

You will find information regarding the fabric composition on the label on your samples or on the back of each swatch in our in store sample books.

If you have any questions or queries regarding your chosen fabrics please visit a Parker Knoll retailer or contact our customer support team who will be happy to assist you. For more information visit [www.parkerknoll.co.uk](http://www.parkerknoll.co.uk).
